Intuit

Delivering 20% Growth Unlocks the 'Triple Double' Bull Case

Intuit is in the early days of two compelling product cycles: 1) Mid-Market Accounting and 2) Assisted Tax. Our analysis grows our confidence in a credible path to 20% growth, which would unlock the 'Triple Double' Bull Case: 1) Double Revenue, 2) Double EPS, and 3) Double the Stock Price.

Our Proprietary Analysis Gives Us Greater Confidence in the 20% Growth Bull Case. Intuit's 2025 Investor Day made clear Intuit is in the early innings of two new product cycles: *Mid-Market Accounting / Services* and *Assisted Tax*. Both are large markets (\$89 billion Mid-Market TAM and \$37 billion Assisted Tax TAM) and ripe for disruption. Intuit's early success in penetrating these new markets was evidenced in FY25, growing their Mid-Market segment 40% YoY and their TurboTax Live segment 47% YoY. Our analysis suggests continued execution across new growth initiatives put in place to accelerate the rollout of these two new product cycles puts the company on an increasingly viable path to 20% total revenue growth in FY30, which is not being priced into the stock today at 22X NTM P/E, the cheapest Intuit has traded at since 2014 ([Exhibit 4](#)). **Based on our proprietary analysis and detailed model of each operating segment (see 7 Key Drivers of the 20% Growth Bull Case & 20% Bull Case Detailed Model), we see a higher probability of the Bull Case of 20% revenue growth and 20%+ EPS growth in FY30 playing out.**

20% Growth Unlocks the 'Triple Double' Bull Case. Driving 20% growth in FY30 would imply revenue doubles from \$19 billion in FY25 to \$43 billion in FY30 ([Exhibit 1](#)), which also means EPS more than doubles from \$20 to \$53 ([Exhibit 2](#)). Conservatively assuming a P/E multiple of 25X, below the long-term average of 33X, would mean Intuit's stock price can also double from \$535 today to \$1,300 by FY30 ([Exhibit 3](#)), a ~20% IRR. **As such, we believe Intuit trading at 22X NTM P/E is a exceptional opportunity to own one of the most durable franchises in all software.**

With this analysis, we raise our Bull Case valuation to \$1,050, nearly 100% upside from current trading levels, to reflect the viable path to doubling Revenue and EPS as these two product cycles ramp in the coming years.

Source: FactSet

The Key Components of 20% Growth:**Mid-Market Accounting (Global Business Solutions Segment)**

- *How do we go from our Base Case to our Bull Case:* Accelerating go-to-market momentum from more accounting firm partnerships and hiring more efficient sales reps lead to greater penetration of Intuit Enterprise Suite (IES) among the existing installed base and more meaningfully captures market share by displacing existing mid-market competitors (NetSuite, Sage). IES reaches 40% of the 800,000 installed base and 18% of the total mid-market customer opportunity with 330,000 subscribers by FY30 compared to 30% in the Base Case (215,000 subs).
- *Why are we confident:* The combination of both a large (and captive) installed base opportunity (~800,000 subs with mid-market business characteristics) and the greenfield opportunity (another ~900,000 mid-market businesses outside of Intuit's customer base) drives our confidence in the bull case subscriber opportunity. This large opportunity combined with a product in IES that already has all the necessary capabilities for mid-market businesses at a fraction of the cost of existing competitors (\$30,000/year) means that Intuit has plenty of runway for growth.
- *What KPIs to watch:* QuickBooks Online Accounting Revenue, Mid-Market Revenue (sometimes given on the earnings call)

Mid-Market Services (Global Business Solutions Segment)

- *How do we go from our Base Case to our Bull Case:* More mid-market accounting subscribers will drive increased usage/adoption of Online Services (Payroll, Payments, Bill Pay, HCM, etc.), as larger customers have

higher propensity to consume and consolidate services on Intuit's platform. This drives an acceleration in the revenue attach rate, which expands to 90% of QuickBooks Online Accounting revenue in our Bull Case by FY30 from 70% today compared to 80% in our Base Case.

- *Why are we confident:* Increased adoption of services is the lowest hanging fruit for Intuit given 1) Customer awareness of offerings remains low with 70% of prospective customers unaware of Payroll services and 65% unaware of Payments offering, and 2) Mix shift to larger customers likely drives services consolidation as doing so saves money and improves platform operability for customers. Additionally, customers leveraging QuickBooks Live show 22 point higher services consumption than non-users, which points to the runway for growth as Intuit invests in 'Human Intelligence (HI)'. Lastly, for reference, Desktop Services achieved a 90% revenue attach rate in FY23, which we think is a proxy for where Online Services attach can go.
- *What KPI to watch:* Online Services Revenue

Assisted Tax (TurboTax Segment)

- *How do we go from our Base Case to our Bull Case:* Intuit has been steadfast in disrupting the Assisted Tax market as evidenced by its improved go-to-market initiatives promoting the value and ease of the Full Service offering at industry competitive prices to go after the 11 million filers who switch preparers yearly. This also includes showing up locally as local presence drives 5x conversion. TurboTax's integration with Credit Karma improves Access to Money offerings and early tax preparation capabilities, driving adoption from Credit Karma users. With 43 million Credit Karma MAUs, this should open up the funnel for further adoption. Our Base Case assumes the Intuit Full Service offering penetrates ~50% of the 11 million switchers and 6% of total Assisted filers by FY30, while our Bull Case points to Full Service capturing ~60% of 11 million tax filing switchers and 7% of 86 million Assisted filers. Our Base Case assumes the Intuit Live Assisted offering penetrates 13% of 86 million Assisted Filers by FY30, while our Bull Case points to Live Assisted penetrating 15% of 86 million Assisted filers.
- *Why are we confident:* FY25's growth acceleration to 47% YoY shows Intuit is starting to crack the formula to take meaningful market share. Given the size of the opportunity, 11 million annual switchers and 86 million Assisted Tax filers, Intuit has plenty of runway. And given Intuit is coming from a market share of essentially zero, they are able to undercut a fragmented competitive landscape of small tax preparer firms on price. Intuit's platform approach will also prove to be a strong advantage as Accounting growth feeds the Business Tax opportunity and Credit Karma momentum drives TurboTax adoption.
- *What KPI To Watch:* TurboTax Live Revenue

What About the AI Bear Case? Since the summer of 2025, Intuit's NTM P/E multiple has compressed from 35X to 22X as the stock has gotten caught up in the broader software malaise and rising investor concerns about AI disrupting incumbent applications vendors like Intuit. We think these fears are misguided for a few reasons:

- **Tax** - The differentiation and value in tax preparation software does not derive from the software which automates filling out a tax form - this has always been a commodity. The differentiation and value comes from: 1) **Brand recognition and trust** that the vendor is going to complete the tax forms correctly (Intuit's biggest asset is their brand recognition, which comes from decades of consumer advertising), 2) **Integration into the broader consumer finance landscape** (payroll providers, banks, brokers, federal, state and local tax authorities), 3) **Ability to get refunds faster**, which necessitates micro-lending functionality to be attached to the solution, and 4) **Ability to get a human on the line** if something goes wrong.
- **Accounting & Services** - Building a general ledger is one of the most complex products to build from a software engineering standpoint, which is why there have not been many new competitors entering the space over the past two decades. We have also spoken with all the startups attempting to disrupt this space (see [Mid-Market ERP Disruption: Who Is Best Positioned to Capture Share?](#)) and even they acknowledge how difficult it will be to disrupt the hold that Intuit has over the accountant go-to-market channel.
- **Intuit is a consumer company and consumers are souring on AI.** Like CEO Sasan Goodarzi has said "SMBs behave and act like consumers", so we really view Intuit as primarily a consumer business. We believe AI bears are underestimating how **consumers are increasingly souring on AI**, making it less likely that consumers / SMBs will feel comfortable enough to lean into new AI vendors, making Intuit's existing solutions even more defensible.

Where We Could Be Wrong

- Bearish AI narrative continues to trump fundamentals in software. In particular, any announcements from the AI Labs about consumer tax functionality can weigh on the shares.
- Mailchimp turnaround does not materialize
- Structural changes in the credit card market may weigh on the demand for lead generation from Credit Karma

Risk Reward – Intuit (INTU.O)

Durable EPS Grower Showing Macro Resiliency

PRICE TARGET \$880.00

~31x Base Case CY27e EPS of \$28.86, implying a PEG ratio of 1.9x, in-line with Intuit's historical average PEG ratio but slightly below large cap software peers at 2.0x.

Consensus Price Target Distribution

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 20 Jan 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

OVERWEIGHT THESIS

Intuit is in the early days of two compelling product cycles: 1) Mid-Market Accounting and 2) Assisted Tax. These product cycles combined with solid yields on efficiency initiatives drive durable high-teens EPS growth, putting Intuit in rarified air among large-cap software peers. Durable mid-teens revenue and high-teens EPS growth are not priced in with the stock trading well below historical PEG ratio of 1.8X and below large cap software average of 1.7x.

Consensus Rating Distribution

Secular Growth: *Positive*
Technology Diffusion: *Positive*

View descriptions of Risk Rewards Themes [here](#)

BULL CASE \$1,050.00

~35x Bull Case CY27e EPS of \$30.27

Monetizing the Platform.

Intuit is able to monetize the QBO platform as well as sustain rapid sub growth, resulting in Quickbooks Online growth of 23% through CY27. TurboTax grows 11% annually through CY27 by gaining share in the Assisted Category, alongside beneficial pricing trends. Total Revenue grows at a CAGR of ~15% while margins expand due to improved monetization, lifting CY27 EPS to \$30.27. Stock trades to ~35x CY27e EPS, or ~2.0x PEG.

BASE CASE \$880.00

~31x Base Case CY27e EPS of \$28.86

Focus on Higher Value Solutions Drives Faster Margin Expansion.

QBO add-ons and other high value solutions gain traction alongside new sub adds, bolstering Global Business Solutions Group Revenue to 16% growth through CY27. Consumer grows ~9% annually through CY27. Margins improve to 41.5% in CY27, resulting in EPS of \$28.86. Stock trades to ~31x CY27 EPS estimate, implying a PEG of ~1.9x, in-line with large cap software peers.

BEAR CASE \$575.00

~21x Bear Case CY27e EPS of \$24.55

Competition heats up and QBO falls short of expectations.

Online proves to be a more competitive market for both tax and small business resulting in price and market share pressure. Competition constrains pricing and units while investments in int'l expansion fail to pay off. Top-line growth of 11% embeds Consumer growth of 6% and SMB growth of 14% thru CY27. Margin expansion is constrained, resulting in CY27e EPS of \$24.55. The stock trades at 24x CY27e EPS.

Risk Reward – Intuit (INTU.O)

7 Key Drivers of the 20% Growth Bull Case

#1: Mid-Market Revenue Maintains ~50% Growth Through FY30

Intuit is well positioned to take share of the Mid-Market ERP segment as platform innovations across QuickBooks Online Advanced and Intuit Enterprise Suite (IES) offerings drive upgrades from Intuit's ~800,000 customer installed base and further penetration of the total 1.8 million customer opportunity. While the move upmarket remains in early innings, we are encouraged by the recent momentum of Intuit's revamped go-to-market strategy: expanding its enterprise-focused salesforce and scaling its accounting firm partnership network. **As Intuit executes on this strategy, we view the long runway for customer penetration to support Mid-Market Accounting segment revenue growth compounding ~40% through FY30 in our Base Case and ~50% in our Bull Case (Exhibit 7, Exhibit 8).** As Mid-Market revenue scales to ~\$4.5 billion in our Base Case and ~\$6 billion in our Bull Case by FY30, representing 13% and 14% of total revenues, respectively, the mix shift toward this high growth segment should accelerate topline growth closer to the 20% aspirational target. The two key elements driving this outlook for growth are IES penetration of the Mid-Market ERP segment and customer upgrades to the QuickBooks Online Advanced offering, both of which we go into further detail below.

For more detail on the mid-market opportunity, please see our deep dive: [Mid-Market ERP Disruption: Who is Best Positioned To Capture Share?](#)

Exhibit 7: Base Case Mid-Market Accounting Revenue Growth Compounds ~40% Through FY30...

Source: Company Data, Morgan Stanley Research

Exhibit 8: ...while Bull Case Growth Compounds ~50% Through FY30

Source: Company Data, Morgan Stanley Research

#2: Intuit Enterprise Suite (IES) Penetrates ~20% of the Mid-Market Customer Opportunity by FY30

Intuit Enterprise Suite (IES) adoption is the first key component driving Intuit's ability to grow the Mid-Market Accounting segment over 40% through FY30. As highlighted in our [Mid-Market ERP deep dive](#), **Intuit is well positioned to penetrate the Mid-Market ERP**

segment with IES as it leverages 1) multi-entity functionality, AI Agent driven workflow automation, and industry-specific capabilities to serve larger, verticalized businesses with revenue ranging \$25-\$100 million, 2) a new salesforce trained to sell the more personalized IES contracts, and 3) a network of accounting firm partnerships to accelerate the pace of adoption. With respect to the advancement of platform capabilities, Intuit is leaning on the large proprietary dataset of insights from their 10 million business customers and 100 million consumer customers, driving an inflection in growth of platform innovation, AI-Agent driven workflow automation, and vertical specific capabilities. While this inflection remains early days, the recent developments are already adding value, with the integration of AI Agents improving platform operability and increasing customer ROI – evidenced in the 80% discovery and repeat engagement rates, the 10% higher payments volume and 5-day early payments using Payments Agent, and the 12 hours saved per month using Accounting Agent. On the new IES salesforce, Intuit has mentioned bringing on more capacity as productivity ramps up, which gives us confidence in their ability to accelerate the rollout in the coming years. Turning to their accounting firm network, we are encouraged by the recent momentum, as Intuit partners with Aprio (top 25 firm), Cherry Bekart (top 25 firm), Rehmann (top 40 firm), and HoganTaylor (top 100 firm), building a strong foundation to attract new partners quickly and accelerate adoption.

As Intuit leans into the advanced capabilities exclusive to IES and into the revamped go-to-market motion, we believe subscriber growth may follow a similar path as the QuickBooks Online Advanced offering (launched October 2021), which saw customers scale to ~220,000 over its first six years. Our FY30 Base Case assumes IES customers grow from an estimated ~10,000 customers in FY25 to ~216,000 customers in FY30, which would imply Intuit penetrates 27% of its installed base opportunity and 11% of the total 1.8 million mid-market customer opportunity ([Exhibit 11](#)). **An accelerated pace of innovation of the platform's industry specific accounting capabilities, enhancement to the platform's AI Agent-driven workflow automation, and scaling of Intuit's accounting firm partnership network drives our Bull Case view that IES penetrates ~40% of the installed base opportunity and ~17% of the total mid-market customer opportunity, scaling to ~330,000 customers by FY30 ([Exhibit 12](#)).** We are increasingly confident Intuit has the potential to expand the rollout of IES to our Bull Case level given the power of their proprietary dataset to drive innovation, as well as the leverage garnered from the early success partnering with Private Equity backed accounting firms looking to digitize both their own firm and the businesses they serve. Lastly, Intuit's mix shift towards higher-value IES contracts should contribute to faster QuickBooks Online Accounting segment growth, and in turn, topline growth as the segment's contribution to total revenue increases. Our Base Case penetration rate suggests IES contributes 6% of Total Revenue by FY30, while our Bull Case penetration rate points to IES driving 9% of total revenue by FY30 ([Exhibit 9](#), [Exhibit 10](#)).

Exhibit 9: IES Customers Scale to ~216K by FY30, Representing 12% of the Mid-Market Opportunity in our Base Case

Source: Company Data, Morgan Stanley Research

Exhibit 12: ...While Bull Case Points To Faster Penetration Driven By Better Execution On Platform Innovation and GTM Strategy

Source: Company Data, Morgan Stanley Research

#3: QuickBooks Online Advanced Customers Double by FY30 to ~800,000

The second piece driving durable 40%+ growth in Mid-Market Accounting revenues through FY30 revolves around the new AI Agent capabilities driving upgrades to QuickBooks Online Advanced offering. As mentioned above, Intuit's new workflow automation capabilities are driving improved platform operability and higher ROI for customers. As Intuit leverages its data to further accelerate product rollout, and in turn customer ROI, we believe the company may double QBO Advanced customers from ~350,000 in FY25 to 700,000+ in FY30, a ~15% CAGR through FY30 in our Base Case ([Exhibit 13](#)). With that said, **the runway for growth given both ~7 million core QBO customer and 1.8 million Mid-Market customer opportunities gives us increased confidence in our Bull Case view of QBO Advanced customers growing at a ~20%**

CAGR through FY30, which may prove to be conservative in comparison to the 36% CAGR over the past 5 years (Exhibit 14).

Exhibit 13: Base Case QBO Advanced Customer Growth Doubles by FY30

Source: Company Data, Morgan Stanley Research

Exhibit 14: Bull Case QBO Advanced Customer Growth Compounds High Teens Through FY30

Source: Company Data, Morgan Stanley Research

#4: QuickBooks Online Services Ex-Mailchimp Attach Rate Rises to ~90% by FY30

As Intuit ramps its platform's capabilities to service larger, more verticalized businesses, the largest revenue opportunity lies in driving consolidation of services spend (Payments, Payroll, Bill Pay, HCM, etc) onto the platform. Intuit points out customers leverage an average of 7-25 applications to fulfill their business needs, which highlights the runway to further monetize the new capabilities on IES and QBO Advanced, as larger customers consolidate services spend on Intuit to both maximize the platform's ROI and minimize spend across disjointed applications. Strong traction within this opportunity is evidenced by higher mid-market customer spend, with Payroll and Payments penetration rates exceeding non-mid-market customers by 12 and 9 points, respectively. Additionally, customers leveraging QuickBooks Live show 22 point higher services consumption than non-users, which points to the runway for growth as Intuit invests in 'Human Intelligence (HI)'. **With Intuit 1) driving mix shift toward the Mid-Market and 2) incentivizing greater service consumption as new Agentic capabilities improve platform operability, we anticipate Online Services Ex-Mailchimp revenue attach rate rises from ~70% in FY25 to ~80% by FY30, driving a ~20% revenue CAGR through FY30 in our Base Case (Exhibit 15, Exhibit 17).** With that said, early indication of strong services penetration and AI Agent adoption among mid-market customers gives us increased confidence in our Bull Case view of the attach rate rising to ~90% by FY30 (a similar rate to Desktop Attach in FY23), driving a ~30% revenue CAGR over the next 5 years (Exhibit 16, Exhibit 19).

#5 TurboTax Live Revenue Delivers Durable 26% Growth Through FY30

The success of TurboTax (TT) Live in FY25 underscores the commercial viability of Intuit's Assisted Tax strategy in addressing the 86 million Assisted filers within the \$37 billion TAM. The two key drivers of this success came from strong adoption of both TT Live Full Service and TT Live Assisted offerings. With Intuit building on the momentum in FY25 by expanding its local presence (20 brick-and-mortar stores, 600 expert offices, 13,000 tax experts) and doubling down on pre-tax season marketing campaigns to target undecided filers, we believe the company will continue to disrupt the Assisted Tax market and deliver durable ~20% revenue growth through FY30 in our Base Case ([Exhibit 19](#)). **Given the low penetration of the large 86 million assisted tax filer opportunity, we are**

increasingly confident Intuit can leverage the scale and brand recognition of its platform to drive customer growth even higher, putting our Bull Case of 26% TurboTax Live revenue growth through FY30 in play ([Exhibit 20](#)).

Below, we go into further detail on the two key drivers here: TurboTax Live Full Service returns and TurboTax Live Assisted returns.

Exhibit 19: TurboTax Live Revenue Maintains 20% Growth Durably Through FY30 in Our Base Case...

Source: Company Data, Morgan Stanley Research

Exhibit 20: ...While Our Bull Case Points to Growth Accelerating to 26% Through FY30.

Source: Company Data, Morgan Stanley Research

#6: TurboTax Full Service Returns Grow 7x by FY30 to 6 Million

Intuit's focus on delivering done-for-you experiences is highlighted by the momentum in adoption of their new Full Service offering, which we estimate grew over 300% YoY as the company shifted gears to disrupting the Assisted Tax market. With FY25 marking an inflection point in Full Service customer growth, we believe Intuit may build on this early momentum as it doubles down on its local presence, invests in more tax experts, and fuels further awareness of its product offerings. Given the scale of this new opportunity – 86 million Assisted Tax filers and 11 million filers who switch tax preparers yearly – we are optimistic Intuit may increase their Full Service customers over 6X to ~5 million returns by FY30 in our Base Case, which would represent ~6% of the 86 million Assisted Tax filers or ~50% of the 11 million annual switchers ([Exhibit 21](#)). **Further, as Intuit accelerates the scale of its new go-to-market motion, we believe these additional investments may drive our Bull Case view the Full Service offering grows 7X to ~6 million, representing ~7% of the 86 million Assisted Tax filers or ~60% of the 11 million annual switchers ([Exhibit 22](#)).**

Exhibit 21: Base Case Full Service Returns Grow 6X to ~5M Returns by FY30

Source: Company Data, Morgan Stanley Research

Exhibit 22: Bull Case Full Service Returns Grow 7X to ~6M Returns by FY30

Source: Company Data, Morgan Stanley Research

#7: TurboTax Assisted Returns Capture 15% of the 86 Million Assisted Tax Filer Market Opportunity

The second key driver of the TurboTax Live growth algorithm revolves around the continued integration of QuickBooks and Credit Karma (CK) platforms. With over 40 million CK monthly active users and 10 million businesses on QuickBooks, Intuit is well positioned to grow their TurboTax Live Assisted customer base as they 1) enhance interoperability across these offerings, 2) promote year-round tax-related data entry to streamline and simplify the tax filing process, and 3) scale their 'Access to Money' offerings to drive greater conversion from cash-strapped businesses. **Both the 'low-hanging fruit' installed-base opportunity and the rapid platform innovation give us increased confidence Intuit may grow their Assisted offering customer base 7% through FY30 in our Base Case and 9% through FY30 in our Bull Case (Exhibit 23). These Base and Bull Case growth rates would suggest Intuit captures ~13% and ~15% of the 86 million Assisted Tax filer market opportunity, respectively (Exhibit 24).**

Exhibit 23: Base Case Assisted Tax Customers Grow 7% Through FY30, Capturing 13% of the Market Opportunity

Source: Company Data, Morgan Stanley Research

Exhibit 24: Bull Case Assisted Tax Customers Grow 9% Through FY30, Capturing 15% of the Market Opportunity

Source: Company Data, Morgan Stanley Research

What Does This Mean for Margins?

Despite initial concerns these additional investments might weigh on margin expansion, we expect the rollout of these two product cycles to help Intuit continue expanding operating margins 50-100 bps yearly, as it has most years since FY19. Intuit's three primary areas of investment – the IES salesforce, the expanded local tax presence, and the new platform capabilities – are scaling through efficiency, which may support greater margin expansion going forward as revenue growth accelerates. On the IES salesforce, we highlight the analysis in our mid-market note around [the impact of IES go-to-market strategy on operating margins](#), which points to ~1.5% growth in total operating expenses as Intuit scales its IES salesforce by 100%-200%. Nevertheless, the steep acceleration in topline revenue driven by IES expansion would well offset this expense growth. On the expanded local presence, Intuit has emphasized its local presence strategy is deliberately asset-light and scalable, designed to maintain the company's high margins. Given the tangible ROI evidenced in the 5x better conversion rates for filers nearby a physical store, Intuit may more than offset these modest additional costs with the durable growth of TurboTax Live customers. Lastly, on platform innovation costs, Intuit has repeatedly spoken to the broad efficiency gains it sees as AI adoption expands – 40% faster coding, 30% increase in development velocity from standardizing code, documentation, and testing procedures, and 6x speed in platform development, among others. These efficiencies have already driven around \$135 million in annual savings within their customer success department alone, which may further incentivize Intuit to do more with less. **As Intuit capitalizes on the mid-market and assisted tax opportunities, we anticipate operating margins to continue expanding at a pace broadly consistent with the 50-100 bps of growth YoY since 2019, with both our Base Case and Bull Case Operating Margins expanding to ~44% by FY30 (Exhibit 25, Exhibit 26).**

Exhibit 25: Base Case Operating Margins Expand to ~44% by FY30

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

The Triple Double Bull Case

Mapping a Path to 20% Growth

- Investors left Intuit's 2025 Analyst Day with one main question: Is there a path to 20% revenue growth?
- While 20% growth is management's aspirational goal, we see an opportunity for Intuit to return to this level of growth as the business ramps two key product cycles in 1) Mid-Market Accounting and Services and 2) TurboTax Live

Segment YoY Growth Rates To Achieve 20% Bull Case

Source: Company Data, Morgan Stanley Research

The Triple Double Bull Case

20% Growth
Drives Double
Revenues and
Double EPS

- 20% growth in FY30 would imply Total Revenue doubles from \$19B in FY25 to \$43B in FY30...
- ...Driving over 100% growth in EPS from ~\$20 in FY25 to ~\$53 in FY30

FY30 Bull Case Revenue Doubles to ~\$43 Billion

FY30 Bull Case EPS Doubles to ~\$53/sh

Source: Company Data, Morgan Stanley Research

The Triple Double Bull Case

**An Implied \$1,300
Stock Price in
FY30**

- With revenues and EPS doubling, and conservatively assuming a P/E multiple of 25X (below the long-term average of 33X) suggests INTU could double from ~\$529 today to \$1,300 by FY30 – a ~20% IRR
- With INTU trading at 22x NTM P/E today, the lowest since 2014, we believe current valuation levels provide an attractive entry point for investors to own one of the most durable franchises in all Software

The Triple Double Bull Case			
	FY25A	FY30E	Multiplier
Revenue (\$B)	19	42	2.3x
EPS	\$20	\$53	2.6x
P/E Multiple	26x	25x	
Stock Price	\$529	\$1,300	2.5x

Morgan Stanley

Mapping The Path to 20% Growth: Mid-Market Accounting

Mapping The Path to 20% Growth: Mid-Market Accounting

Mid-Market Accounting Growth

- Both the rollout of Intuit Enterprise Suite (IES) and the durable growth of upgrades to QuickBooks Advanced support mid-market accounting revenue growth compounding near ~50% through FY30 in our Bull Case...
- ...which suggests Mid-Market Accounting would make up ~50% of QuickBooks Online Accounting and ~15% of Total Revenue

Bull Case Mid-Market Accounting Revenues Compound Near 50% to ~\$6B, Making Up ~15% of Total Revs by FY30

Source: Company data, Morgan Stanley Research

Mapping The Path to 20% Growth: Mid-Market Accounting

Scaling Intuit Enterprise Suite (IES)

- Intuit is well positioned to penetrate the Mid-Market ERP segment with IES as it leverages:
 - Multi-entity functionality, AI Agent driven workflow automation, and industry-specific capabilities to serve larger, verticalized businesses with revenue ranging \$25-\$100 million
 - A new salesforce trained to sell the more personalized IES contracts
 - A network of accounting firm partnerships to accelerate the pace of adoption

Bull Case IES Revenues Scale to ~\$2.6B, Making Up ~10% of Total Revs by FY30

Source: Company data, Morgan Stanley Research

Mapping The Path to 20% Growth: Mid-Market Accounting

Intuit Enterprise Suite (IES) Customer Growth

- 3 key drivers behind our Bull Case view IES penetrates ~40% of the installed base opportunity and ~20% of the total mid-market customer opportunity, scaling to ~330,000 customers by FY30:
 1. An accelerated pace of innovation of the platform's industry specific accounting capabilities
 2. Enhancement to the platform's AI Agent-driven workflow automation
 3. Scaling of Intuit's accounting firm partnership network

IES Customers Scale to ~330K in Bull Case, Capturing ~40% of Installed Base Opportunity

Source: Company data, Morgan Stanley Research

Mapping The Path to 20% Growth: Mid-Market Accounting

Intuit Enterprise Suite (IES) ARPU Growth

- Intuit noted a >2x average ARPC uplift to IES from core QBO offerings in FY25, suggesting a ~\$6,500 ARPC per entity
- Bull Case IES ARPU growth compounds high single digits through FY30 as:
 - New Agentic capabilities increase value for customers and may enable Intuit to drive durable price increases
 - Low initial pricing allows for Intuit to raise prices over time

Bull Case Suggests ~\$6,500 ARPC Per Entity Compounds at an 8% CAGR Through FY30

Source: Company data, Morgan Stanley Research

Online Ecosystem Ex-Mailchimp: The Mid Market

Price Increases: QuickBooks vs Xero

- Confidence in the sustainability of price increases is further evidenced by one of Intuit's main competitors, Xero, raising prices at a similar rate to Intuit despite their less dominant market presence...
- ...which points to the long runway for monetization

ARPC – QBO SMB vs Xero

ARPC Growth Rates – QBO SMB vs Xero

Source: Company data, Morgan Stanley Research

Mapping The Path To 20% Growth: Mid-Market Accounting

QuickBooks Advanced Revenue

- AI Agent driven innovation within the QBO Advanced Accounting offering may accelerate the pace of upgrades within the ~800,000 core QBO customer installed base
- Bull Case view suggest QuickBooks Advanced customers more than double from ~350,000 to ~800,000 by FY30
- As Intuit's mix shifts towards larger, higher-value customers, we expect ARPU to continue compounding low double digits through FY30

Bull Case QBO Advanced Accounting Revenue Compounds ~35% Through FY30

Source: Company data, Morgan Stanley Research

Morgan Stanley

Mapping The Path To 20% Growth: Online Services Ex-Mailchimp

Mapping The Path To 20% Growth: Online Services Ex-Mailchimp

The Online Services Ex-Mailchimp Opportunity

- Intuit highlights businesses leverage an average of 7-25 applications to fulfill their needs, which highlights the runway to further monetize new service capabilities on IES and QBO Advanced...
 - ...driven by larger customers consolidating services spend on the platform to both maximize the platform's ROI and minimize spend across disjointed applications
- With Intuit 1) driving mix shift toward the Mid-Market and 2) incentivizing greater service consumption as new Agentic capabilities improve platform operability, we anticipate Online Services Ex-Mailchimp revenue attach rate rises from ~70% in FY25 to ~90% by FY30

Bull Case Online Services Ex-Mailchimp Attach Rates Expand to ~90% of Accounting Revenue...

...Driving Revenues to ~\$11B in FY30, Making Up 26% of Total Revenues

Source: Company data, Morgan Stanley Research

Mapping The Path To 20% Growth: Online Services Ex-Mailchimp

Attach Rates: Online Services Ex-MC vs Desktop

- Online Services attach rates will continue to rise in relation to Desktop Services as:
 - Intuit migrates Desktop customers to Online offerings
 - Mid-Market penetration drives mix shift towards larger customers consuming more services on the platform
- Shift from Desktop and towards Online Mid-Market gives us increased confidence Online Services Ex-Mailchimp attach rates can rise to the same level as Desktop attach rates in FY23

Bull Case: Online Services Ex-Mailchimp vs Desktop Attach Rates

Source: Company data, Morgan Stanley Research

Morgan Stanley

Mapping The Path To 20% Growth: TurboTax Live

Mapping The Path To 20% Growth: TurboTax Live

TurboTax (TT) Live Revenue Growth Outlook

- Intuit's early success in penetrating their new \$37 billion Assisted Tax TAM was evidenced by the strong adoption of their TurboTax Live offering in FY25, growing revenue 47% YoY as customers leaned on Intuit's 'Done-for-You' tax option – Full Service
- We expect TurboTax revenue growth to accelerate as 1) Intuit prioritizes the disruption of the Assisted Tax market with TT Live offerings, and 2) TurboTax mix shifts towards TT Live (41% of the franchise today growing to 68% by FY30 in our Bull Case)

Source: Company data, IRS, Morgan Stanley Research

Mapping The Path To 20% Growth: TurboTax Live

TurboTax (TT) Live Contribution to Total TT Growth

- Our Bull Case suggests TurboTax Live Full Service and Live Assisted Offerings will contribute to 100% of Total TurboTax revenue growth YoY by FY30...
- ...with Full Service contributing to ~60% of growth YoY and Live Assisted contributing to ~40% of growth YoY

Source: Company data, IRS, Morgan Stanley Research

Mapping The Path To 20% Growth: TurboTax Live

TT Live Revenue Outlook

- Mix shift to TurboTax (TT) Live will drive a reacceleration in total TT revenues...
 - ...with our Bull Case pointing to revenue compounding ~25% through FY30, contributing to ~70% of Total TT Revenues by FY30
- Low penetration of the large 86 million assisted tax filer opportunity today gives us confidence Intuit can leverage the scale and brand recognition of its platform to drive customer growth even higher, putting our Bull Case of ~25% TurboTax Live revenue growth through FY30 in play

Source: Company data, Morgan Stanley Research

Mapping The Path To 20% Growth: TurboTax Live

TT Live: Full Service and Live Assisted Revenue Opportunities

- Intuit's focus on delivering done-for-you experiences is highlighted by the momentum in adoption of their new Full Service offering, which we estimate grew over 300% YoY as the company shifted gears to disrupting the Assisted Tax market.
 - With FY25 marking an inflection point in Full Service customer growth, we believe Intuit may build on this early momentum as it doubles down on its local presence, invests in more tax experts, and fuels further awareness of its product offerings
- Additionally, continued integration of QuickBooks and Credit Karma platforms with TurboTax may likely drive durable Live Assisted revenue growth through FY30

Bull Case Full Service and Live Assisted Revenues Growth Compounds ~60% and ~15% YoY, Respectively, Through FY30

Source: Company data, Morgan Stanley Research Footnote: Live Full Service offering places the entire customer tax filing process with a tax expert, while Live Assisted offering guides customers through the filing process with intuitive UI and expert help.

Mapping The Path To 20% Growth: TurboTax Live

TT Live: Full-Service Customer Growth

- With FY25 marking an inflection point in Full Service customer growth, Intuit may build on this early momentum as it doubles down on its local presence, invests in more tax experts, and fuels further awareness of its product offerings
 - These additional investments drive our Bull Case view the Full Service offering grows 7X to ~6 million, representing ~7% of the 86 million Assisted Tax filers or ~60% of the 11 million annual switchers

Source: Company data, Morgan Stanley Research Footnote: Live Full Service offering places the entire customer tax filing process with a tax expert, while Live Assisted offering guides customers through the filing process with intuitive UI and expert help.

Mapping The Path To 20% Growth: TurboTax Live

TT Live: Live Assisted Customer Growth

- With over 34 million Credit Karma monthly active users (MAUs) and 10 million businesses on QuickBooks, Intuit is well positioned to grow their TurboTax Live Assisted customer base as they:
 - Enhance interoperability across these offerings,
 - Promote year-round tax-related data entry to streamline and simplify the tax filing process
 - Scale their 'Access to Money' offerings to drive greater conversion from cash-strapped businesses
- Both 'low hanging fruit' installed-base opportunity and rapid platform innovation give us increased confidence Intuit may grow the Live Assisted customer base 9% through FY30 in our Bull Case

Source: Company data, Morgan Stanley Research Footnote: Live Full Service offering places the entire customer tax filing process with a tax expert, while Live Assisted offering guides customers through the filing process with intuitive UI and expert help.

Mapping The Path To 20% Growth: TurboTax Live

TurboTax DIY (Ex-Live)

- Intuit is confident TurboTax DIY (Ex-Live) will maintain their ~80% dollar share of the ~\$4 billion DIY market
- Our Bull Case suggests revenue growth will remain in line with the industry growth of 1% YoY, bringing down contribution to TurboTax revenues from 59% in FY25 to 32% by FY30

Source: Company data, Morgan Stanley Research

Morgan Stanley

Implications for Margins / EPS

Operating Income and Margin Expansion

Bull Case Operating Margins

- Intuit's three primary areas of investment – the IES salesforce, the expanded local tax presence, and the new platform capabilities – are scaling through efficiency, which may support greater margin expansion going forward as revenue growth accelerates
- Our Bull Case points to Operating Income compounding at a 20% CAGR through FY30, translating to over 44% Operating Margins in FY30

Source: Company data, Morgan Stanley Research

Earnings Per Share

Earnings Per Share

- Driving 20% growth in FY30 would imply revenue doubles from \$19 billion in FY25 to \$43 billion in FY30...
- ...which means EPS more than doubles from \$20/sh to \$53/sh

Source: Company data, Morgan Stanley Research

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of December 31, 2025)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1519	41%	415	48%	27%	674	42%
Equal-weight/Hold	1583	43%	362	42%	23%	720	45%
Not-Rated/Hold	4	0%	1	0%	25%	1	0%
Underweight/Sell	564	15%	87	10%	15%	216	13%
Total	3,670		865			1611	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Atlassian Corporation PLC, Microsoft, Workday Inc. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Please use the provided link to review the Terms and Conditions and Most Important Terms and Conditions for Morgan Stanley India Company Private Limited (https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms_and_conditions.pdf) and the following link to review the audit report (<https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/>

Research_Audit_Report.pdf).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
